										SHEET 2 OF 3	

Original plans displayed some ambiguous details, or illegible and where not included.

Stations 1-9 are temporary to facilitate building only.
 Frames are doubled either side of station line with floor timbers on aft side.
 Deck batten is shown as 2" x 6" located to stations.
 An additional lower batten has been added picking up Stations 1 to 9 also.
 It is expected that both battens will be fitted and fixed to stations prior to frames being inserted.

See "Station set-up" for details.
 Stations are undersize by 3 1/8" made up of frame and planking.
 These can be increased but not decreased, planking specified at 1 1/8" finished down to 1".

Frames made up of 1" stock doubled and 2" wide.
